Media\SN\Messaging\Facebook\Facebook Setup

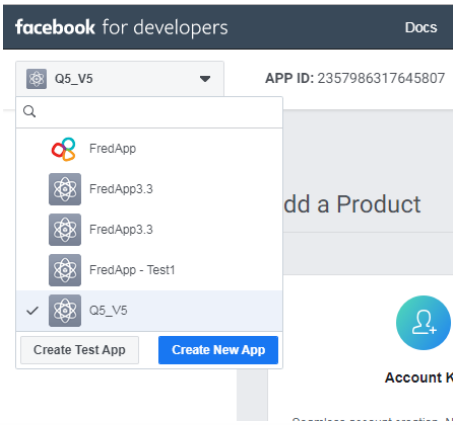
- Facebook app Setup
  - Create your Facebook App
  - Set your Facebook App
  - Enable test user for test before review
  - Activate Facebook product

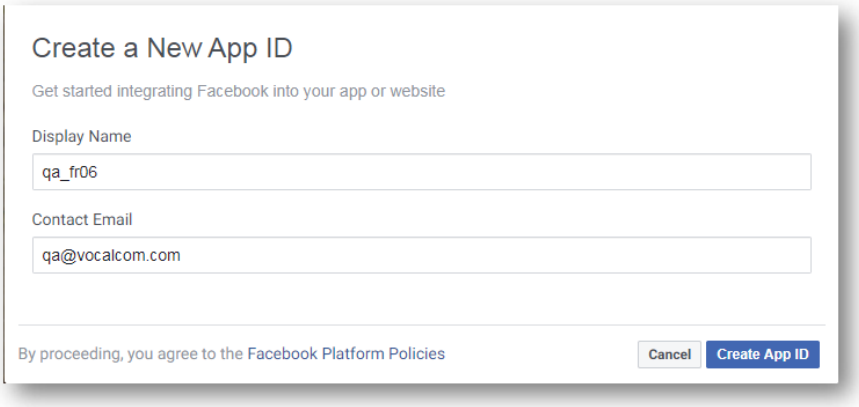
Facebook app Setup

Create your Facebook App

To start we should point to https://developers.facebook.com/ website with your Facebook account.

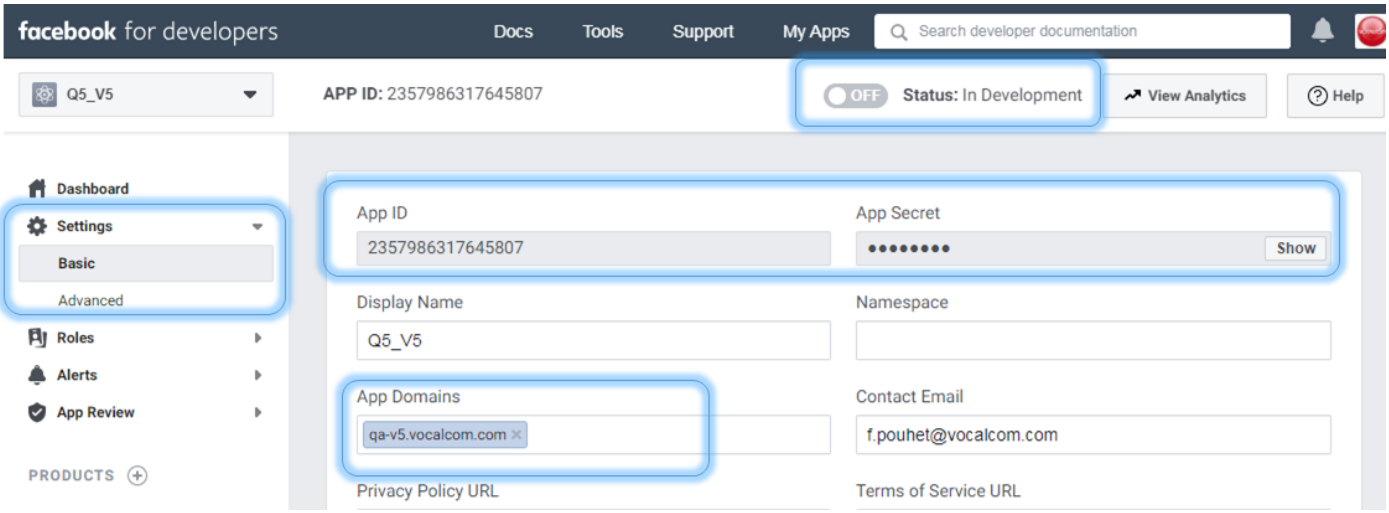
Clic on “Create New App”, give it a name and a contact email





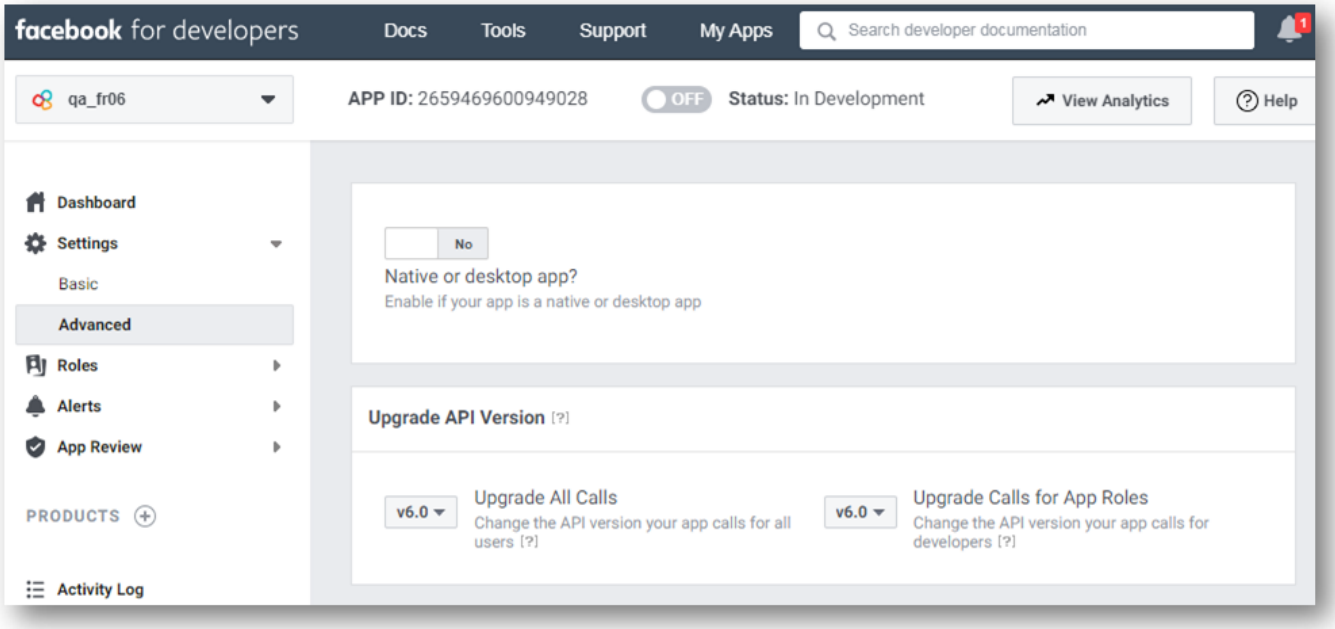
Set your Facebook App

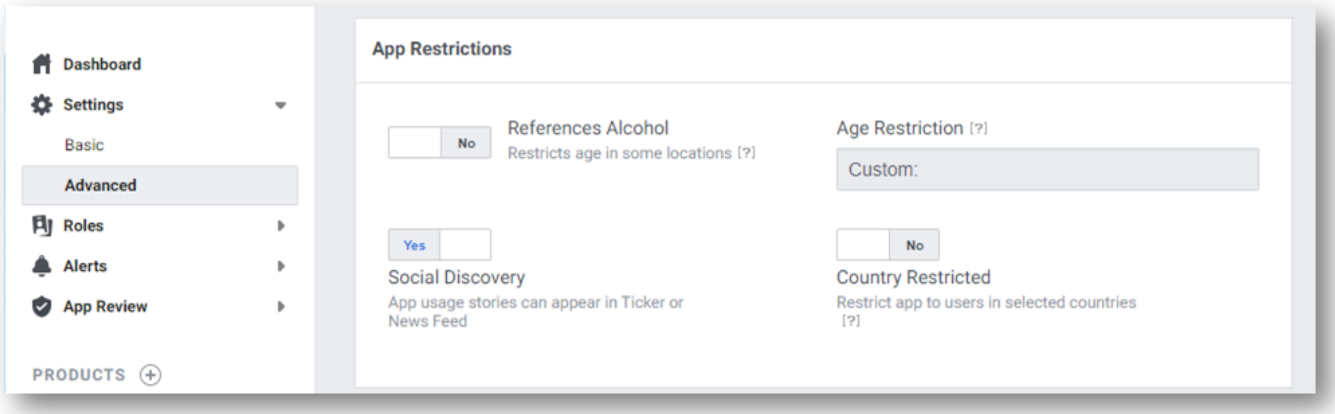
1. Go to App\Settings\Basic
   a. Status is in development : Must stay like this to test until the Review is Approved
   b. Set the “App Domains” with the domain of the server hosting TheLinkTools component (must be “`vocalcom-software.com`” if you are using vocalcom cloud version)
   c. Collect AppID and AppSecret : automaticaly generated by Facebook. used in Hermes campaign configuration.

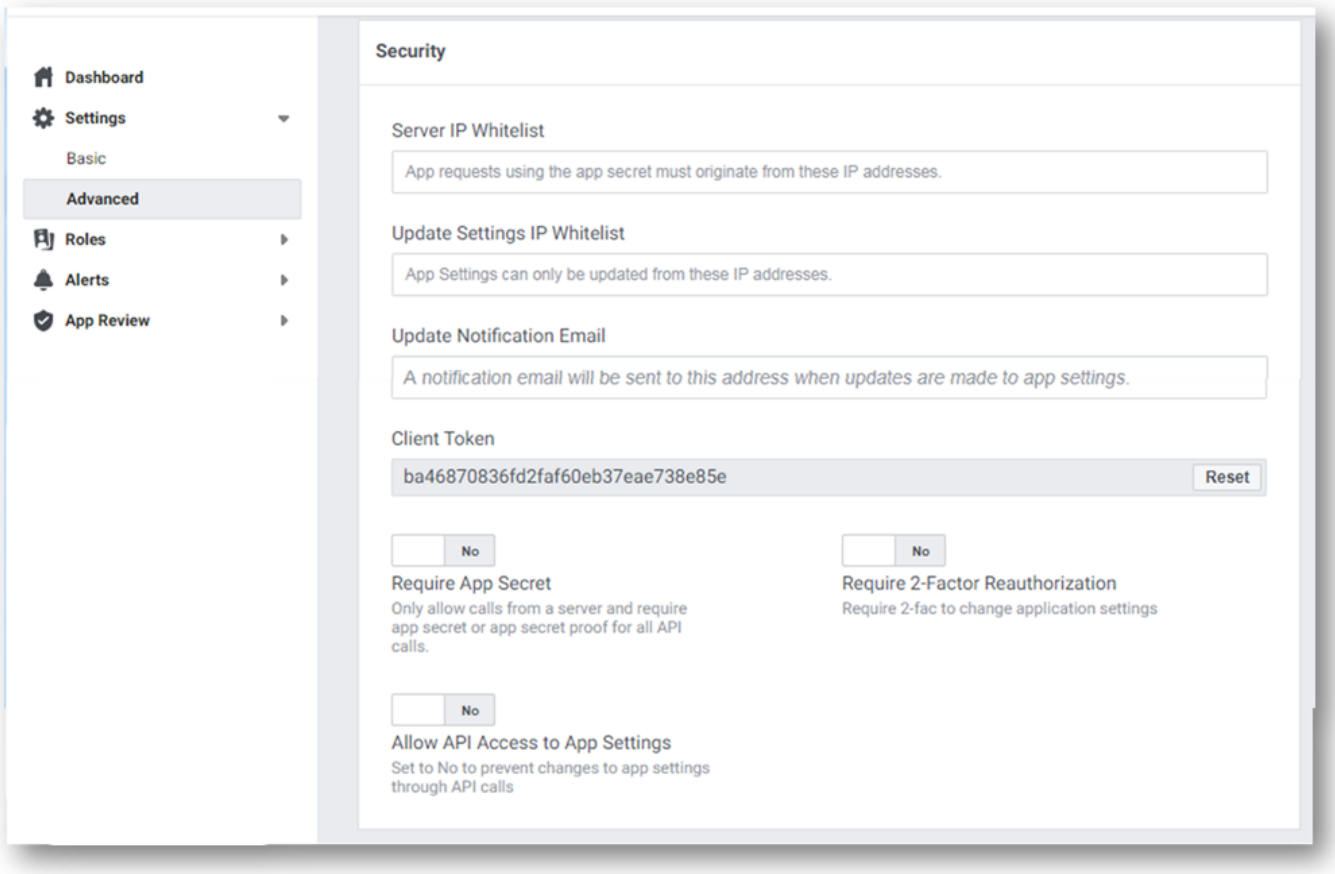


1. Go to App\Settings\Advanced

    a. Default value should remains (you can check sample bellow)

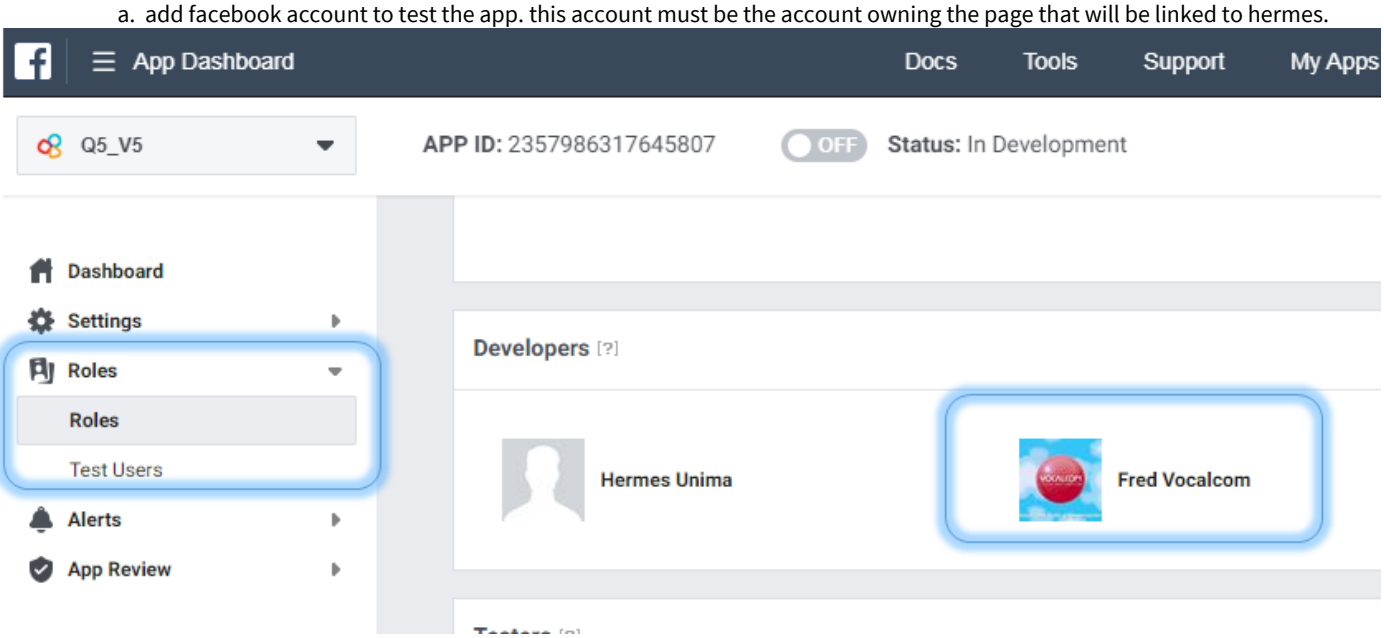






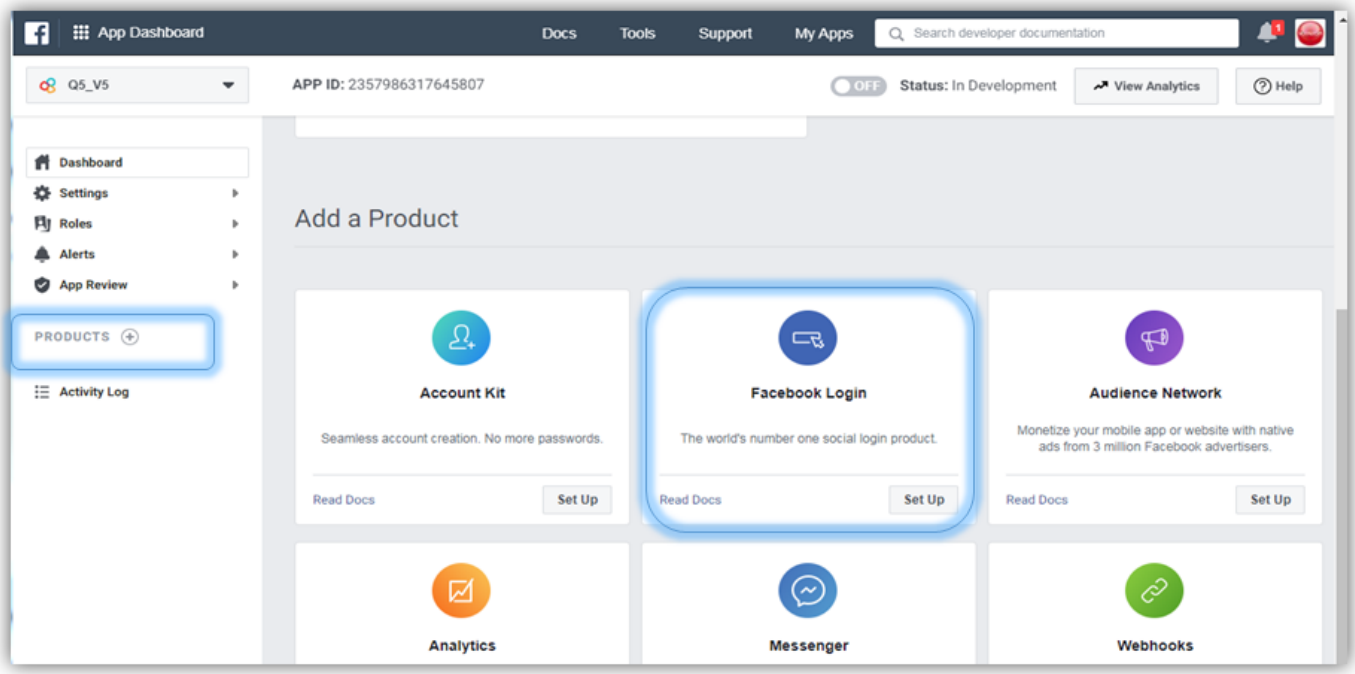
Enable test user for test before review

1. Go to App\Roles\Role
    a. add facebook account to test the app. this account must be the account owning the page that will be linked to hermes.

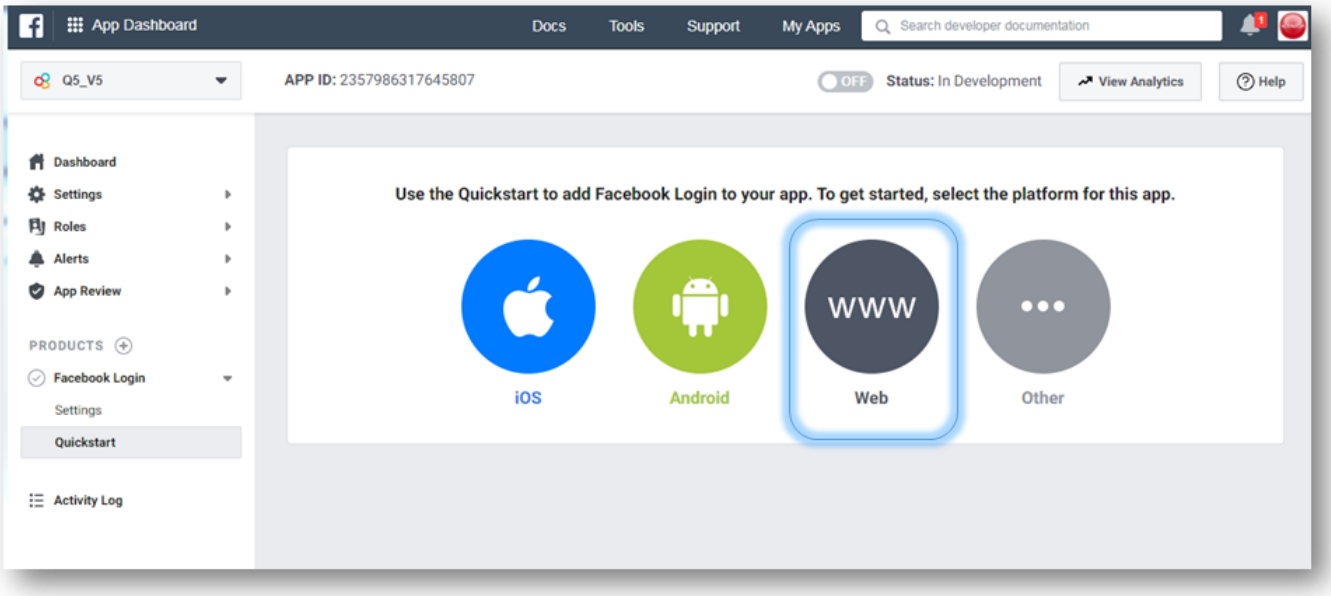


Activate Facebook product

1. Clic on Product + icon from left menu
2. Clic on Setup bouton from “Facebook Login” Component

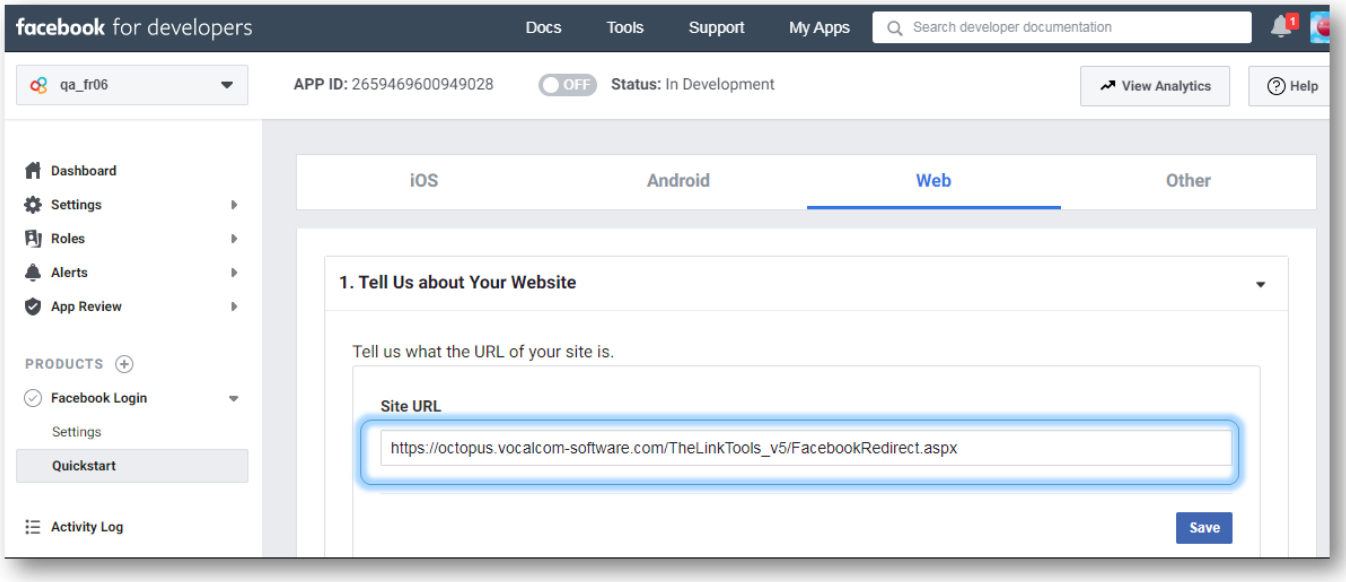


Then select Web Application



Set the site URL that is configured in your hermes Plateforme

> The site URL is the site URL displayed in the Hermes campaign configuration page.
> ex if using cloud version:
> `https://octopus.vocalcom-software.com/TheLinkTools_v5/FacebookRedirect.aspx`



Finish the wizard with default values

Check Product configuration

1. Go to App\Product\FacebookLogin\Settings
    a. check configuration as bellow

> The “Valid OAuth Redirect URIs” URL is the site URL displayed in the Hermes campaign configuration
> ex if using cloud version:
> `https://octopus.vocalcom-software.com/TheLinkTools_v5/FacebookRedirect.aspx`
