Note description

This technical note explains how to create a Facebook application to manage social networks through Hermes.Net admin interface.

Add a Facebook « Developer » application

Only developer accounts of Facebook are allowed to create Facebook applications, this part of document explains how to subscribe into Facebook as a developer.

First of all, we need a Facebook account and login on this URL: <http://www.facebook.com/> or execute the standard subscription procedure:

The screenshot shows the Facebook homepage. At the top left is the Facebook logo. To its right is the text "where to login ==>". Below this is a login form with fields for "Email" (containing "thelink@vocalcom.com.tr") and "Password" (masked with dots), a "Log in" button, a "Keep me logged in" checkbox, and a "Forgotten your password?" link. Below the login form is a promotional banner for "Get Facebook Mobile" featuring a smartphone icon and the text "Heading out? Stay connected. Visit facebook.com on your mobile phone." To the right of this banner is a "where to sign up ==>" label. The sign-up form is titled "Sign Up" and includes the text "It's free and always will be." The form fields are: "First Name:", "Last Name:", "Your email address:", "Reenter email address:", "New Password:", "I am:" with a "Select Gender:" dropdown, and "Birthday:" with "Day:", "Month:", and "Year:" dropdowns. Below the birthday fields is a link "Why do I need to provide my date of birth?". At the bottom of the sign-up form is a green "Sign Up" button. Below the sign-up form is a link "Create a Page for a celebrity, band or business."

When we have been logged in as a Facebook user, we have to use the following URL to install the Facebook Developer application : <http://www.facebook.com/developers?ref=ts>
Then, click "Allow"

Request for Permission

Developer is requesting permission to do the following:

 **Access my basic information**
Includes name, profile picture, gender, networks, user ID, list of friends, and any other information I've made public.

→ 
Developer
★★★★☆

Creation of a Facebook application

After adding the Facebook “Developer” application, we can access it using the following URL : <https://developers.facebook.com/apps>.

Then, to create a Facebook application, we just have to click on “create new application”

Documentation Support Blog Apps

Apps

[Edit App](#) [+ Create New App](#)

Welcome to the Developer App.
Learn how to build a social experience by referring to the documentation below, or create an app by clicking on the 'Create New App' button above.

 **Websites**
Using Facebook on your Website allows you to create a more personalized, social experience using Social Plugins such as the Like Button and simplifies your registration and sign-in process using Login Button and Registration Plugin

Enter the name of the application; choose a namespace (unique)

The screenshot shows a 'New App' dialog box with the following fields and status:

- App Display Name:** [?] NameOfTheApplication Valid
- App Namespace:** [?] yourownnamespace Available
- I agree to the Facebook Platform Policies.**

Below the checkboxes, a note reads: "Please note that your app name cannot contain Facebook trademarks or have a name that can be confused with an app built by Facebook." At the bottom right, there are 'Continue' and 'Cancel' buttons.

Facebook will ask for a security code :

The screenshot shows a 'Security Check Required' dialog box with a captcha. The instructions are: "Enter both words below, separated by a space. Can't read the words below? Try different words or an audio captcha." The captcha image displays the number '11' and the word 'benefit'. Below the image, there is a text input field containing '11 benefi' and a 'What's this?' link. At the bottom right, there are 'Submit' and 'Cancel' buttons.

If a popu pis displayed, continue, and confirm your account by sms or credit card :

New App

You can no longer create apps because our systems indicated that your account may not be authentic. Facebook requires users to provide their real first and last names, and fake accounts are a violation of our Statement of Rights and Responsibilities (SRR 4.1), even when used to host or test apps. Also note that maintaining multiple accounts, even if they are authentic, is also prohibited. If you would like to create a test user to test app functionality, you can do so here: http://developers.facebook.com/docs/test_users/.

If you believe you have received this message in error, please submit an appeal: https://www.facebook.com/help/contact_us.php?id=140703502680919.

App Display Name: [?]

App Namespace: [?] You can update this later

I agree to the Facebook Platform Policies.

Please note that your app name cannot contain Facebook trademarks or have a name that can be confused with an app built by Facebook.

Finally, we have a Facebook application with needed information to use into the web admin of Hermes.Net Social Networks management.

That page represents the main configuration of the application, parameters with red squares have to be saved.

Now, create a campaign « The Link » in the web admin of Hermes.Net, fill in the configuration of the campaign with parameters of FB:

1- Go to the tab « The Link » under the web admin

The screenshot shows the 'Hermes.Net Administration' interface. On the left, there is a 'Company / site choice' tree with 'Vocalcom' selected. The main area displays the configuration for a campaign named 'The Link'. A dropdown menu is open, showing options like 'Outbound calls', 'Manual calls options', 'Outbound e-mails', 'The Link', 'Call status', and 'Black list'. The 'The Link' option is highlighted with a red rectangle. Below the dropdown, the 'General' tab is active, showing the following configuration details:

Description	app FB the Link
App ID/API Key	276140519085035
Application secret	d33739d82976da2f5fc90f61b3466bef
